

Homework – Quadratic Formula #3

Solve with the quadratic formula

1) $x^2 - 6x + 2 = 0$

$$x = 3 \pm \sqrt{7}$$

2) $x^2 - x - 1 = 0$

$$x = \frac{1 \pm \sqrt{5}}{2}$$

3) $x^2 + 3x - 2 = 0$

$$x = \frac{-3 \pm \sqrt{17}}{2}$$
