# Homework – Solving Systems by Graphing
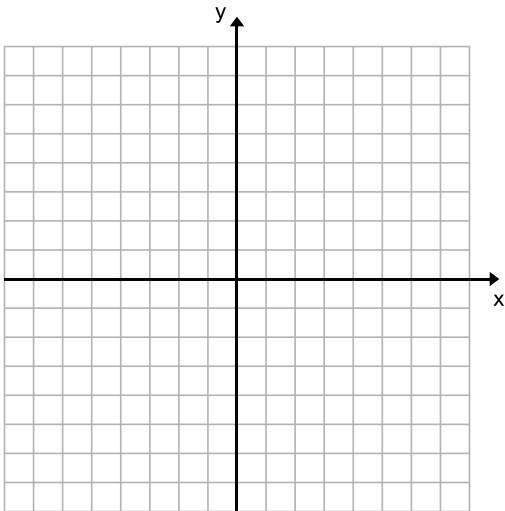

Solve by graphing

1) $3x - 2y = 2$
   $x + 2y = 6$

2) $2x - 3y = 1$
   $x + y = 3$

3) $x - 3y = -5$
   $-2x + 3y = 10$

4) $x - y = -1$
   $-2x + y = -2$
